Sustainability Related Subjects

College of Agriculture	
Total subjects: 1	122 Sustainability Related Subjects: 34
Course title	Notes
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
vater resources dep. (economical natural	skills development and general environmental cultures and keep natural
esources)	resources as a sustainable effort
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
vater resources dep. (Soil survey and	skills development and general environmental cultures and keep the soil
classification)	which is a very important natural resource
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
vater resources dep. (Soil and water	skills development and general environmental cultures and keep the soil and
•	water which are very important natural resources
	Incorporates themes relating to social sustainability and focuses on practical
	skills development and general environmental cultures and keep water which
	are very important natural resource
	Incorporates themes relating to social sustainability and focuses on practical
-	skills development and general environmental cultures and keep water which
	are very important natural resource
	Incorporates themes relating to social sustainability and focuses on practical
_	skills development and general environmental cultures and keep the soil
	which is a very important natural resource
	Incorporates themes relating to social sustainability and focuses on practical
_	skills development and general environmental cultures and keep the soil
	which is a very important natural resource
	Incorporates themes relating to social sustainability and focuses on practical
_	skills development and general environmental cultures and keep the soil
	which is a very important natural resource
	Incorporates themes relating to social sustainability and focuses on practical
	skills development and general environmental cultures
	Incorporates themes relating to social sustainability and focuses on practical
	skills development and general environmental cultures
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
	skills development and general environmental cultures
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
_	skills development and general environmental conservation cultures and
	laws
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
vater resources dep. (Democracy)	skills development and general environmental conservation cultures and
	laws
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
_	skills development and general environmental cultures
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
-	skills development and general environmental cultures
	Incorporates themes relating to social sustainability and focuses on practical
_	skills development and general environmental cultures
	Incorporates themes relating to social sustainability and focuses on practical
=	skills development and general environmental cultures
	Incorporates themes relating to social sustainability and focuses on practical
_	skills development and general environmental cultures
vater resources dep. (soil fundamental)	skins development and general environmental cultures

water resources dep. (soil environment	skills development and general environmental cultures
Meteorological)	Same development and general environmental careares
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
water resources dep. (Principles of plant	skills development and general environmental cultures
protection)	omino del cospinioni di la gonera cominanta con con co
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
water resources dep. (Agricultural	skills development and general environmental cultures and keep the soil
Guidance Principles)	which is a very important natural resource
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
water resources dep. (soil fertility)	skills development and general environmental cultures and keep the soil
	which is a very important natural resource
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
water resources dep. (Soil and water	skills development and general environmental cultures and keep the soil and
pollution)	water which are very important natural resources
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
water resources dep. (remote sensing)	skills development and general environmental cultures and keep the soil and
	water which is a very important natural resource using the remote sensing
	techniques
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
water resources dep. (soil salinity)	skills development and general environmental cultures and keep the soil
	which is a very important natural resource
BA Agricultural sciences/ soil sciences and	Incorporates themes relating to social sustainability and focuses on practical
water resources dep. (drainage)	skills development and general environmental cultures and keep the soil and
	water which is a very important natural resource
BA Agricultural sciences/ animal	Incorporates themes relating to social sustainability and focuses on practical
production dep. (English 1)	skills development and general environmental cultures
BA Agricultural sciences/ / animal	Incorporates themes relating to social sustainability and focuses on practical
production dep. (English 2)	skills development and general environmental cultures
BA Agricultural sciences/ animal	Incorporates themes relating to social sustainability and focuses on practical
production dep. (English 3)	skills development and general environmental cultures
BA Agricultural sciences/ / animal	Incorporates themes relating to social sustainability and focuses on practical
production dep. (English 4)	skills development and general environmental cultures
BA Agricultural sciences/ / animal	Incorporates themes relating to social sustainability and focuses on practical
production dep. (soil fundamental)	skills development and general environmental cultures and keep the soil
	which is a very important natural resource
BA Agricultural sciences/ / animal	Incorporates themes relating to social sustainability and focuses on practical
production dep. (human rights)	skills development and general environmental cultures
BA Agricultural sciences/ animal	Incorporates themes relating to social sustainability and focuses on practical
production dep. (Democracy)	skills development and general environmental cultures

College of Computer Science and Information Technology Total subjects: 95 Sustainability Related Subjects: 24	
Course title	Notes
BA Computer sciences and information technology/ Computer sciences dep. (English 1)	Incorporates themes relating to social sustainability and focuses on practical skills development and general environmental cultures
BA Computer sciences and information technology/ Computer sciences dep. (English 2)	Incorporates themes relating to social sustainability and focuses on practical skills development and general environmental cultures
BA Computer sciences and information	Incorporates themes relating to social sustainability and focuses on practical

tachnology/ Computer sciences den	skills development and general environmental cultures
technology/ Computer sciences dep. (English 3)	skiils developitient and general environmental cultures
BA Computer sciences and information	Incorporates themes relating to social sustainability and focuses on practical
technology/ Computer sciences dep.	skills development and general environmental cultures
	skiils developitient and general environmental cultures
(English 4)	Incorporates themes relating to social sustainability and focuses on practical
BA Computer sciences and information	Incorporates themes relating to social sustainability and focuses on practical
technology/ Computer sciences dep.	skills development and general environmental conservation cultures and laws
(Human rights)	In a way a water the areas watering to special a vetain a hillity and for your an awastical
BA Computer sciences and information	Incorporates themes relating to social sustainability and focuses on practical
technology/ Computer sciences dep.	skills development and general environmental conservation cultures and laws
(Democracy)	Incorporates themes relating to cocial sustainability and focuses on practical
BA Computer sciences and information	Incorporates themes relating to social sustainability and focuses on practical
technology/ Computer sciences dep.	skills development and using computer to help the sustainability in some fields
(Human Computer Interaction)	
BA Computer sciences and information	Incorporates themes relating to sustainability and focuses on programming
technology/ Computer sciences dep.	skills development and using computer to help the sustainability in some fields
(Artificial Intelligence 1)	
BA Computer sciences and information	Incorporates themes relating to sustainability and focuses on programming
technology/ Computer sciences dep.	skills development and using computer to help the sustainability in some
(Artificial Intelligence 2)	fields
BA Computer sciences and information	Incorporates themes relating to sustainability and focuses on programming
technology/ Computer sciences dep. (web	skills development and using computer to help the sustainability in some
programming)	fields and design the WebPages for sustainability purposes and environmental
	issues
BA Computer sciences and information	Incorporates themes relating to sustainability and focuses on programming
technology/ Computer sciences dep.	skills development and using computer to help the sustainability in some
(computer architecture 1)	fields and environmental issues
BA Computer sciences and information	Incorporates themes relating to sustainability and focuses on programming
technology/ Computer sciences dep.	skills development and using computer to help the sustainability in some
(computer architecture2)	fields and environmental issues
BA Computer sciences and information	Incorporates themes relating to sustainability and focuses on programming
technology/ Computer sciences dep.	skills development and using computer to help the sustainability in some
(computer networks)	fields and environmental issues
BA Computer sciences and information	Incorporates themes relating to sustainability and focuses on programming
technology/ Computer sciences dep.	skills development and using computer to help the sustainability in some
(probability and statistic)	fields and environmental issues and do the simulation for environmental
200	probability
BA Computer sciences and information	Incorporates themes relating to social sustainability and focuses on practical
technology/ IT dep. (Human rights)	skills development and general environmental cultures
BA Computer sciences and information	Incorporates themes relating to social sustainability and focuses on practical
technology/ IT dep. (English 1)	skills development and general environmental cultures
BA Computer sciences and information	Incorporates themes relating to social sustainability and focuses on practical
technology/ IT dep. (English 2)	skills development and general environmental cultures
BA Computer sciences and information	Incorporates themes relating to social sustainability and focuses on practical
technology/ IT dep. (English 3)	skills development and general environmental cultures
BA Computer sciences and information	Incorporates themes relating to social sustainability and focuses on practical
technology/ IT dep. (English 4)	skills development and general environmental cultures
BA Computer sciences and information	Incorporates themes relating to social sustainability and focuses on practical
technology/ IT dep. (Democracy)	skills development and general environmental cultures
BA Computer sciences and information	Incorporates themes relating to social sustainability and focuses on practical
technology/ IT dep. (Human Computer	skills development and using computer to help the sustainability in some
Interaction)	fields

BA Computer sciences and information	Incorporates themes relating to sustainability and focuses on programming
technology/ IT dep. (Information System	skills development and using computer to help the sustainability in some
Security & Risk management (1))	fields and environmental issues and risk management
BA Computer sciences and information	Incorporates themes relating to sustainability and focuses on programming
technology/ IT dep. (Information System	skills development and using computer to help the sustainability in some
Security & Risk management (2))	fields and environmental issues and risk management
BA Computer sciences and information	Incorporates themes relating to sustainability and focuses on programming
technology/ IT dep. (Artificial Intelligence)	skills development and using computer to help the sustainability in some
	fields

College of Administration and Economic Total Subjects: 205 Sustainability Related Subjects: 13	
Course title	Notes
BA administration and economic/ business	Incorporates themes relating to social sustainability and focuses on practical
management dep. (human rights)	skills development and general environmental cultures
BA administration and economic/ business	Incorporates themes relating to social sustainability and focuses on practical
management dep. (principle of economy 1)	skills development and general environmental cultures and its impact with
	the economy
BA administration and economic/ business	Incorporates themes relating to social sustainability and focuses on practical
management dep. (principle of economy 2)	skills development and general environmental cultures and its impact with
	the economy
BA administration and economic/ business	Incorporates themes relating to social sustainability and focuses on practical
management dep. (Feasibility study)	skills development and general environmental cultures and the feasibility of
	all sustainable project
BA administration and economic/ business	Incorporates themes relating to social sustainability and focuses on practical
management dep. (Risk management)	skills development and general environmental cultures and study the risk
	managements which impact and effect the sustainability.
BA administration and economic/	Incorporates themes relating to social sustainability and focuses on practical
accounting dep. (human rights)	skills development and general environmental cultures
BA administration and economic/	Incorporates themes relating to social sustainability and focuses on practical
accounting dep. (principle of economy)	skills development and general environmental cultures and its impact with
	the economy
BA administration and economic/	Incorporates themes relating to social sustainability and focuses on practical
accounting dep. (natural resources	skills development and general environmental cultures and its impact with
accounting)	the economy and the natural resources
BA administration and economic/	Incorporates themes relating to social sustainability and focuses on practical
economy dep. (human rights)	skills development and general environmental cultures
BA administration and economic/	Incorporates themes relating to social sustainability and focuses on practical
economy dep. (democracy)	skills development and general environmental cultures
BA administration and economic/ general	Incorporates themes relating to social sustainability and focuses on practical
managements dep. (human rights)	skills development and general environmental cultures
BA administration and economic/general	Incorporates themes relating to social sustainability and focuses on practical skills
managements dep. (environmental management)	development and general environmental cultures to manage the environment
